IN THE SPECIFICATION

Please amend the paragraph beginning at page 1 line 25 of the Specification as follows:

Due to the use of a connection dedicated to this data exchange, these systems are not very user friendly and are suitable only for a specific use with the single telephone operator which is handling the connection. Thus, users that are not registered with this operator do not have access to ~~these~~ this data.

Please amend the paragraph beginning at page 4 line 23 of the Specification as follows:

-    it comprises means of debiting said exchange authorization data, associated, thanks to said user identifiers, with said used access instrument, in order to debit ~~these~~ this data according to the data exchanges;

Please amend the paragraph beginning at page 5 line 29 of the Specification as follows:

~~These~~ This data to be consulted is organized in a tree manner, such that there is a first free access page I, serving as the page for entering a conditional access data zone designated by the general reference I*.

Please amend the paragraph beginning at page 8 line 12 of the Specification as follows:

The means 24 thus establish a catalog of usable access instruments from this list and ~~these~~ this data.

Please amend the paragraph beginning at page 10 line 1 of the Specification as follows:

In particular, ~~these~~ this data include the address of the page I for entry into the conditional access zone, and advantageously for added security, the addresses of each of the data pages constituting the conditional access data zone referenced I*.

Please amend the paragraph beginning at page 10 line 6 of the Specification as follows:

~~These~~ The data previously stored in the database 22 also comprise a list of authorized access instruments for access to the data I*, and conditions of access to ~~these~~ the data I*, such as the cost of access, the authorized access times, the possible debit methods, debit per time spent, per action, per subscription, etc.

Please amend the paragraph beginning at page 12 line 6 of the Specification as follows:

According to ~~these~~ this data, the means 26 of determining parameters automatically determine exchange control parameters, such as a maximum access time, a volume of data, a number of authorized actions, etc.

Please amend the paragraph beginning at page line 26 of the Specification as follows:

In parallel to these data exchanges and under the control of the server 20, the user management server 14 gains access to the means 19 of debiting the exchange authorization data 18 in order to debit them from the cost of these exchanges during steps 72 and 74.

Please amend the paragraph beginning at page 15 line 33 of the Specification as follows:

~~These~~ The data comprise, for example, the number of the calling telephone line and the time of the call and are transmitted to the means 24 of establishing a catalog of usable access instrument during a step 115.

Please amend the paragraph beginning at page 16 line 11 of the Specification as follows:

With the aid of ~~these~~ this data and of the data transmitted by the analysis means 7 and the interrogation means 36, the means 24 automatically establish a catalog of usable access instruments.

Please amend the paragraph beginning at page 22 line 1 of the Specification as follows:

In yet other embodiments, the means 8 of supervision of the receiver station 6 are produced with the aid of executable software means called ~~"appliquettes"~~ "applets" or "Javascript" or yet make use of the resident identification files at the receiver station 6 routinely called "cookies".
